

Wir lassen eingehend NUR die Ports 21, 80 und 443 (FTP, HTTP, HTTPS) auf unseren Online-Systemen zu.

Die Benutzung anderer Ports (auch versuchsweise) führt automatisch zu einer Sperre der anfragenden IP-Adresse.

We ONLY allow ports 21, 80 and 443 (FTP, HTTP, HTTPS) for incoming requests to our online server.

The use of other ports (even experimentally) automatically leads to a lock of the requesting IP address.
